

# Crab Instructions & Pattern

Print the pattern on the next page of this document. Cut out roughly then attach to your fabric/felt with stick pins. We used fabric for the body and thick felt for the rest.

Carefully cut out along the pattern lines.

Assemble your crab pieces: bottom body first then claws Last put on the top of the body or shell. The stick pins will hold the crab together while you sew. Leave an opening to stuff.

Use polyester filling to stuff the body of your crab.

Stuff the crab then sew up the opening.

Use craft glue to glue on googly eyes.
