

# Sea Turtle Instructions & Pattern

1

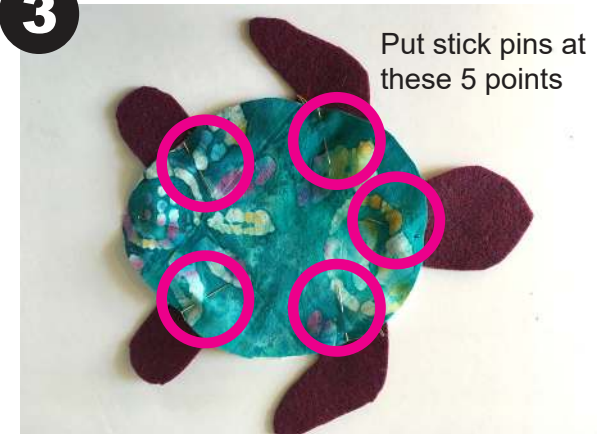

Print 2 copies of the pattern on the next page of this document. You'll need 2 of the body pattern. Cut out roughly then attach to your fabric/felt with stick pins. We used fabric for the body and thick felt for the rest.

2

Carefully cut out along the pattern lines.

3

Assemble your turtle pieces: bottom body first, then flippers, legs, head. Last put on the top of the body or shell. Point stick pins inward so they don't polk you while sewing. The stick pins will hold the turtle together while you sew. Leave an opening to stuff.

4

Use polyester filling to stuff the body of your turtle.

5

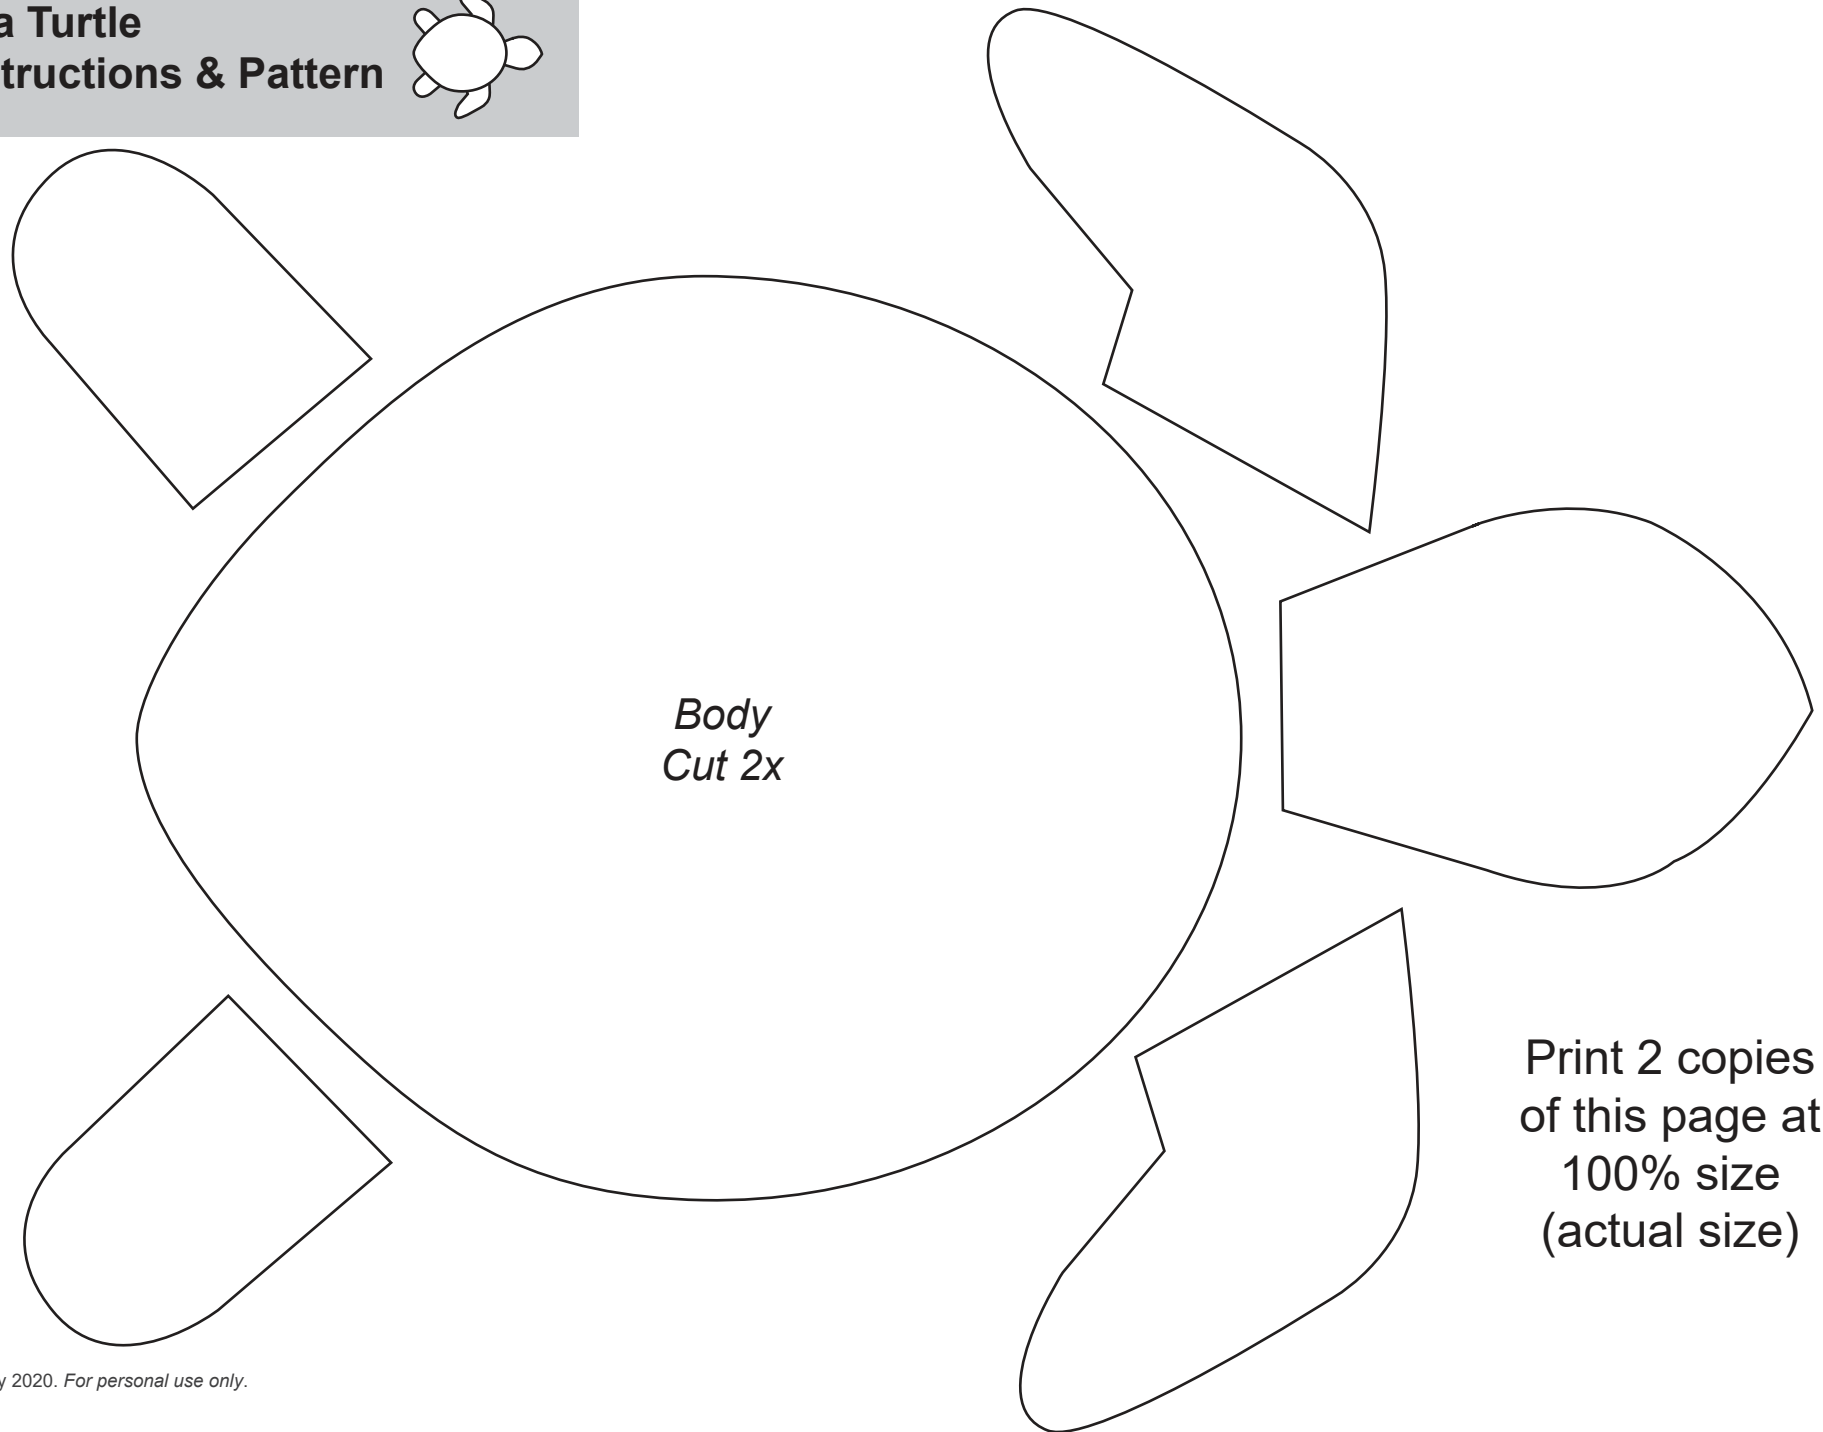

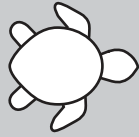

Stuff the turtle then sew up the opening.

6

Use craft glue to glue on googly eyes.
